Professional Summary

Electrical Engineer with strong expertise in power distribution, electrical design, site execution, and shop drawings. Experienced in Revit, AutoCAD, DIALux, ECODIAL, and classic control systems. Proven ability to execute site installations, prepare technical documentation, and coordinate with multidisciplinary teams. Seeking to contribute to high-impact engineering projects with a strong focus on quality, safety, and efficiency.

Professional Experience

Electrical Site Engineer – Tower for Construction and Architecture Co. (August 2025 – Present)

- Worked on the **Ain Sokhna Emergency Hospital Project**, supervising electrical and low current installations in compliance with healthcare standards and international codes.
- Executed installation and testing of lighting systems, power distribution systems, and various grounding systems (earthing, bonding, clean ground for medical equipment).
- Implemented and supervised installation of Low Current Systems including:

1. Access Control System
2. Nurse Call System
3. Master Clock System
4. IP CCTV Surveillance System
5. Data & Telephone Structured Cabling System
6. Wi-Fi Network Infrastructure
7. Fire Alarm System
8. Public Address (PA) System

- Prepared, reviewed, and approved **shop drawings** for all electrical and ELV systems in coordination with the technical office.
- Developed and submitted **as-built drawings** reflecting actual site execution.
- Reviewed site activities to ensure compliance with project specifications, approved drawings, international codes (NFPA, IEC), and industry best practices.
- Coordinated with MEP disciplines, consultants, subcontractors, and procurement teams to ensure smooth workflow and timely project delivery.
- Conducted inspections, testing, and commissioning activities ensuring full compliance with QA/QC and safety standards.
- Resolved technical site issues and provided engineering solutions to maintain project progress and quality standards.

Technical Office Engineer – Delta for Construction Co. (Jan 2025 – July 2025)

- Prepared electrical shop drawings, as-built drawings, and technical documentation.

- Performed load calculations, cable sizing, and voltage drop analysis.
- Assisted in preparing BOQs and material submittals.
- Ensured coordination between design requirements and site execution.

Education

B.Sc. Electrical Power & Machines Engineering – Al-Azhar University. (2018 - 2023)

Graduation Project: MPPT Technique in Solar Energy Systems.

Technical Skills

- Electrical Design (LV Systems) Power Distribution.
- Technical Office and Shop Drawings.
- AutoCAD and Revit (MEP).
- DIALux Evo.
- Classic Control Systems.
- Schneider ECODIAL, And ETAP.
- Load Estimation, And Cable Sizing.
- Microsoft Office.

Internships & Training

DAR ALKAHRBAA – Revit MEP Electrical Course. (June - Jul 2023)

Giza Cables Industries – LV/MV/HV Cable Manufacturing. (Jun 2023)

Classic Control Course. (Jan 2023)

MAM Factory for Electric Panels Manufacturing – LV Panels Design & Assembly. (Sep 2022)

Eduneers Co. – Electrical Design, BOQ, SLD, Load Estimation, Tendering. (Jun–Sep 2022)

Arab Contractors – Site Execution & Shop Drawing. (Jul 2021)

ABB Internship. (Aug 2022)

Schneider Energy University Online Training. (Aug 2021)
